Easy Guide to Climate Change

Scientists across the world generally agree global warming if not curtailed will have a devastating effect on our planet. Human activities over the last century or more have helped increased carbon-dioxide emissions in driving up temperatures. Extreme weather and melting polar ice now appear to be some of the known effects. Click [here](#) to know more and share with others.

Recycling is a real driver for change.

Recycling brings people in communities together to support change and make a real difference. Recycling helps with environmental wellbeing, community volunteering and can create employment opportunities in cities, towns and villages across Ireland. As more people try reusing or recycling the greater the benefits to homes and communities. Read 15 recycling facts [here](#) to encourage you!

Remembering our Colleague, Gerry Mulvaney, who sadly passed away on 28/03/2020. Gerry was a quiet, content and very obliging worker, who enjoyed his work and the company of his close colleagues. He was an early bird and was regularly an hour or more early for work. Being so committed to his work he was always determined to carry out his duties in the warehouse. The photo taken by a customer, shows Gerry, enjoying a break from his regular dismantling, while working with the collection team. We are so glad that customer took this spontaneous photo of Gerry and then sent it on to us. This is how we will remember Gerry in Recycle IT. May he rest in peace.
